

HIT IT LONG. HIT A DRAW.

► **All-new Multi-material construction saves weight and repositions the CG low, back, and towards the heel**

- 6-layer carbon crown with 9-1-1 skeletal titanium body

► **Draw-biased design**

- More weight in the heel promotes closing the face at impact
- Increased offset, slightly closed face, and more upright position encourages R-to-L trajectory (for RH golfers)
- Slightly closed face with draw-promoting crown cosmetic helps eliminate slices

► **GEOACOUSTIC Technology**

- Advanced sole shaping with recessed toe panel enables club face expansion for added forgiveness
- Externalized sound ribs optimize clubhead vibration for exceptional sound and feel

► **Deeper, more active Speed Pocket**

- 3x More active than original M2 to increase flexion and forgiveness across the clubface
- Generates high launch/low spin shots to achieve massive distance

► **Premium Features and Options**

- Matrix MFS5 White Tie Stock Shaft with 30+ additional no-upcharge shafts
- Dual Feel Grip
- New ultra-lightweight, Aluminum, 4° Loft Sleeve with 12 settings
